

## SEMINAR SERIES IN BIOSTATISTICS

**E.F. Haghish, PhD**

Department of Psychology  
Oslo University  
Oslo, Norway

**April 15, 2021**

**15:00-17:00**

**Zoom**

**(MEETING ID: 651 0002 8770) (PWD: 490973)**

### **”Publication-ready data analysis with Stata: Reproducible research and literate programming”**

I will talk about reproducible research, what it means to statisticians and how researchers can approach it properly. I will also talk about communicating data analysis in a research project and producing analysis report. Finally, I talk about embedding analysis reporting within a data analysis. Stata will be the main software for the presentation, although R code will be provided for interested audience as well.

Dr. Haghish received a joint PhD in Statistics from University of Freiburg, Germany and University of Southern Denmark, Denmark, and his research is focused on reproducible research as well as developing software for improving statistical education
