

SEMINAR SERIES IN BIOSTATISTICS

December 19, 2019

15:30 - 16:30

Seminar Room: Aula De Lillo

Building U7 - 2nd floor

Saverio Stranges, MD, PhD, FAHA

Schulich School of Medicine & Dentistry, Western University

Department of Epidemiology and Biostatistics

Epidemiology and prevention of cardiometabolic disease in the era of multimorbidity: a global perspective

This seminar will provide a global overview on the epidemiology and prevention of major cardiometabolic disease in the context of multimorbidity and aging. It will focus on examples of Dr Stranges's own research in this field. Specific areas will be: (1) the role of micronutrients and dietary patterns in cardio-metabolic health; (2) the health implications of sleep disturbances; (3) current & future public health challenges in the area of cardio-metabolic disease
