

CUSSB MONDAY TALKS

Biostatistics Seminar Series

Monday, May 11, 2026 – 2.00PM

Virtual seminar

Global Variation in Cardiometabolic Risk Structures: A 48-Country Comparative Bayesian Network Analysis in 146,000 Participants using WHO STEPS Data

Speaker: Masih Babagoli

Icahn School of Medicine at Mount Sinai, NY, USA

<https://msteams.link/AJGV>

MEETING ID: 363 484 750 379 735 **PASSCODE:** J5rR3qC2

Monday, May 18, 2026 – 3.30PM

In-person seminar

Beyond the tyranny of p-values: why evidence synthesis needs Bayesian meta-analysis

Speaker: Gian Luca Di Tanna

DEASS-SUPSI (Lugano) Centre for Health Research Methodology,
School of Nursing, Midwifery and Evidence Science, University of
Galway

Seminar Room Sant'Atanasio – DiBIT2
Vita-Salute San Raffaele University

Monday, May 25, 2026 – 3.30PM

In-person seminar

On the probability of decisive evidence in clinical trials: Bayes factors and sample size determination

Speaker: Fulvio De Santis

Università La Sapienza, Roma

Seminar Room Sant'Atanasio – DiBIT2
Vita-Salute San Raffaele University
